

This page is mostly a **dynamic reviews widget** (likely a third-party app like Judge.me/Loox/Yotpo) — there's no real static copy to extract since the actual review content loads via an app embed, not page text.

Customer Reviews

Page Title (SEO): Customer Reviews | [Website Name]
Meta Description: Read genuine, verified customer reviews of [Website Name]'s gemstones, Rudraksha & spiritual jewelry — real experiences from real buyers.
URL Slug: /pages/customer-reviews

H1: What Our Customers Say

Intro (60–80 words):
Every review here comes from a verified buyer — real people who've trusted us for their gemstone, Rudraksha, and spiritual jewelry needs. From authenticity and certification to energization and delivery experience, these reviews reflect what it's actually like to shop with us. We believe transparency builds trust, which is why we display all verified reviews, good and constructive, exactly as our customers share them.

[Reviews Widget Embed Goes Here]
(Dynamic block — pulls live star ratings, review text, customer names, and photos from the reviews app. No static content needed here; the app renders this automatically.)

Why You Can Trust Every Review Here

Anyone can put five gold stars on a website. We would rather earn your trust the harder, honest way — by letting real customers speak in their own words, tied to real orders, with real photos. Here is exactly how these reviews stay genuine.

Verified purchases only

Loox sends a review invitation only after an order is delivered, so each rating is linked to a real GemsMantra customer — never an anonymous or bought account.

We never fake reviews

We do not write, buy, or incentivise five-star reviews, and we never inflate a rating. What you read below is exactly what customers chose to share.

Real photos, real stones

Many reviews include buyer-uploaded photos and videos of the exact rudraksha, gemstone or bracelet received — so you see the actual stone, not just studio images.

Why Customers Trust Us

- ☒ 100% verified buyer reviews — no fake or incentivized ratings
- ☒ [X]+ reviews and counting
- ☒ Average rating of [X.X]/5 across products
- ☒ Certified, energized products — reflected in what customers say about authenticity and service

Have You Shopped With Us?

We'd love to hear about your experience. Share a review after your purchase and help other customers make informed decisions.

Note for developer:

1. This page is meant to house a **reviews app widget** (e.g., Judge.me, Loox, Yotpo, Ali Reviews) — please confirm which app the client is using so the correct embed/shortcode can be inserted.
2. The intro copy above and "Why Customers Trust Us" section are static and can go live as-is once you fill in **[X]+ reviews** and **[X.X]/5** with the client's real current numbers (pull from their reviews dashboard).
3. If the client wants this to also double as an SEO landing page (not just app filler), I can add a longer "Why Reviews Matter" section or embed 4–5 hand-picked review snippets as static backup content — let me know if you want that added.
